

## Using Honorlock With ExamSoft's Exemplify

In order to use Honorlock with Exemplify, certain settings need to be configured on both platforms to ensure compatibility.

Within ExamSoft:

- During the creation of the exam within ExamSoft, the security setting that ensures compatibility is "Non-Secure." This will grant the student access to their desktop applications as well as internet capabilities. This is a key component for Honorlock to function.
  - o Exam creation instructions for ExamSoft - [Legacy portal](#).
  - o Exam creation instructions for ExamSoft - [New Portal](#).

Within Honorlock:

- Once the exam is created with the above settings in ExamSoft, the Honorlock exam can now be created.
  - o Shell Exam Creation Instructions - [Blackboard](#)
  - o Shell Exam Creation Instructions - [Canvas](#)
  - o Shell Exam Creation Instructions - [D2L](#)
- The one setting that needs to be disabled is "Browser Guard." Leaving this feature off will allow students to leave their browser window after proctoring has started. This setting is by default disabled, but it is always recommended to double check before enabling Honorlock. Below is an example of the proctoring window:

### Proctoring Settings

Customize your exam experience by selecting from the proctoring options below

|  |   |               |
|--|---|---------------|
| <b>Record Webcam</b><br>Record student's testing environment using webcam <input checked="" type="checkbox"/>  | <b>Record Screen</b><br>Record student's screen during exam <input checked="" type="checkbox"/>                       | Rt<br>Lc      |
| <b>Student Photo</b><br>Capture student photo before the assessment begins <input checked="" type="checkbox"/> | <b>Student ID</b><br>Capture ID photo before the assessment begins <input checked="" type="checkbox"/>                |               |
| <b>Basic Calculator</b><br>Allow access to a basic on-screen calculator <input type="checkbox"/>               | <b>Scientific Calculator</b><br>Allow access to a scientific on-screen calculator <input checked="" type="checkbox"/> | D<br>Bl       |
| <b>Disable Printing</b><br>Block printing exam content <input checked="" type="checkbox"/>                     | <b>Browser Guard</b><br>Limit browser activity to exam content and Whitelist URLs only <input type="checkbox"/>       | W<br>Al<br>ex |
| <b>Simulated Exam</b>  |   |               |

*Note: As always, this window can be accessed through the Honorlock Tab of your LMS. Once you have ensured this setting is off, the settings can be saved, and students will be able to take their exam!*
