

POSTGRADUATE YEAR ONE

WAYNESBORO HOSPITAL

Pharmacy Residency Program

PGY1 Residency affiliated with Shenandoah University School of Pharmacy

RESIDENCY OVERVIEW

The purpose of the PGY1 residency program at WellSpan – Waynesboro Hospital is to build on Doctor of Pharmacy (PharmD.) education and outcomes to contribute to the development of clinical pharmacists responsible for medication related care of patients with a wide range of conditions, eligible for board certification, and eligible for postgraduate year 2 (PGY2) pharmacy residency training. The PGY1 Pharmacy Residency is conducted by WellSpan – Waynesboro Hospital and affiliated with the School of Pharmacy at Shenandoah University in Winchester, Virginia. Residents will work closely with the healthcare team and patients in various settings to achieve optimal cost-effective care and safety for patients. The residency program will provide essential clinical tools for the pharmacist such as medication therapy management, counseling and teaching patients, medication reconciliation, and medication distribution.

The small size of WellSpan - Waynesboro Hospital allows for personalized hands on resident development. During the last half of the residency, the resident will spend some time at nearby larger WellSpan – Chambersburg Hospital to allow exposure to more unique patient situations.

Our affiliation with Shenandoah University offers residents the opportunity to participate in a Residency Teaching and Learning Curriculum Program.
